

Clinical Intelligence: Essential Radiography

Want to Focus on Radiography?

Radiography is an essential diagnostic tool in Veterinary Practice and therefore understanding x-ray techniques and the use and maintenance of radiographic equipment have become an integral part of the Veterinary Nurse's role. The production of diagnostic images requires skill in the use of equipment, patient positioning and the processing of films.

The Clinical Intelligence Essential Radiography course will equip nurses with a comprehensive understanding of the preparation for, and the process and techniques of everyday procedures using over 400 minutes of interactive video lessons.

Why Choose CCG?

With over 20 years in the Australasian veterinary industry, we know Australian practices best! Benefit from the support of our experienced Trainers and Consultants and enjoy our professional service.
